1106 S Lombardy St, Richmond VA, 23220 | (804) 335-7891 | rcbowling17@gmail.com | [LinkedIn](#)

EDUCATION

University of Virginia, Charlottesville, VA

May 2021

School of Engineering and Applied Science

B.S. Systems Engineering, *Engineering Business Minor, Economics Minor*, GPA: 3.745

PROFESSIONAL EXPERIENCE

FTI Consulting, Richmond VA

Director, Data & Analytics

Mar 2026 - present

Senior Consultant, Data & Analytics

Oct 2023 - Feb 2026

Consultant, Data & Analytics

Oct 2021 - Sep 2023

Treasury & Futures Trading Surveillance Model, Multi-National Investment Bank

- Engineered a custom **Python/SQL** trading surveillance model to detect spoofing and layering across single- and cross-market treasury and futures trading patterns.
- Built an end-to-end ETL pipeline using dynamic SQL stored procedures and **AWS**/command-line tooling to ingest and de-duplicate **1,000+ flat files** across disparate data sources.
- Processed and synthesized **200B+ transaction records**, identifying **500+ instances** of spoofing and layering across a 10-year trading history.

Fair Lending Statistical Review, Financial Services Provider under FDIC Consent Order

- Engineered reproducible ETL workflows on **AWS SageMaker** to reconcile **150M+ credit applications** across 120 credit products into a regulatory-ready analytical warehouse.
- Built automated statistical testing pipelines in **Python** (chi-squared, linear/logistic regression) to identify potential fair lending violations.
- Delivered findings that directly informed the client's regulatory response, used as evidentiary support in a **federal consent order** proceeding.

Enterprise Revenue Recognition & Forecasting Platform, PE-Backed Healthcare Company

- Designed and deployed a production **Redshift** revenue recognition model consolidating **billions of transaction records** across **5+ source systems**.
- Built an automated ETL pipeline to standardize and reconcile multi-source financial data, supporting end-to-end deployment to production.
- Designed a **Tableau** forecasting dashboard delivering cash flow projections to finance leadership, replacing manual reconciliation workflows.

Preference Period & Asset Recovery Analysis, Collapsed Cryptocurrency Exchange

- Engineered a multi-stage waterfall population-selection framework in Python/SQL, scoping **~1,200 accounts** down to the **~50 highest-priority** targets for legal action.
- Constructed dual-methodology (transfer-date and highest-asset) preference valuation models to quantify potential recovery amounts.
- Performed PII clustering to surface related-party account relationships, supporting counsel's insider-trading investigation.

AML Model Validation (SR 11-7), Global Cryptocurrency Exchange

- Led an independent **SR 11-7** validation of customer risk-rating and transaction-monitoring models spanning multiple datacenters and jurisdictions.
- Identified documentation-to-code misalignments and monitoring gaps, producing a formal, audit-ready findings inventory.
- Delivered recommendations aligned to **FATF** and **FFIEC** examination standards to strengthen the client's BSA/AML program.

Employee Behavioral Analytics & Fraud Investigation, Major Financial Services Corporation

- Developed an automated **Databricks** ingestion pipeline consolidating credit card, loan, HYSA, investment, P2P transfer, HR, and badge-swipe data across **300+ employees**.
- Engineered individual behavioral profiles surfacing anomalous transaction patterns and policy violations to support counsel's investigative prioritization.

TECHNICAL SKILLS & INTERESTS

Technical: Python (NumPy, SciPy, scikit-learn), SQL (CTEs, window functions, dynamic SQL, stored procedures), AWS (S3, SageMaker), Databricks, Redshift, DuckDB, Tableau, Plotly, Excel Modeling, PowerShell/BCP, Statistical Modeling (Regression, Chi-Squared/Z-Tests), ETL Pipeline Design, Model Validation (SR 11-7), AML/BSA-KYC

Interests: Fly-Fishing, Skiing, Hunting, Golf, Guitar, Tennis, Soccer, Hiking
